Creating next-gen cloud capabilities for a US-based cybersecurity provider

Key Challenges

- Losing market share to cloud-native competitors

- Legacy platforms hindering scalability, modernization, and user experience

- Outdated user experience impacting customer experience

Business Solution

- Partnered with client to build a next-generation cloud platform

- Adopted agile development for rapid feature rollouts and market responsiveness

- Migrated to a secure, scalable cloud architecture on AWS

- Implemented DevOps practices for continuous integration and delivery (CI/CD)

Business Impact

<6 months taken to launch the SaaS platform

70% end-to-end ownership of strategic initiatives with significant contribution

Increased velocity with frequent SaaS releases via. CI/CD

Retained market share via. cloud-based modernization
