incedo

Gen AI-enabled QA Testing Solution for a Leading US Wealth Management firm

Key Challenges

- High Time and business investments in QA testing by the firm, in spite of high investments made in automation testing

- 60-member team dedicated to QA testing. Potential to leverage productivity of team for development tasks

Business Solution

Incedo brAInspark Gen AI Platform enabled end-to end QA user workflows with focus on following components

> User Story Creator based on Product Specifications

> Story to Test Case Convertor converts User Stories to Test Cases using Gen AI Engine

> Gen AI-enabled scripting for QA Test Automation tools (selenium, appium)

> Prompt-enabled documentation as part of QA cycle workflow

> Enterprise specific QA LLM model to drive high accuracy of output

> Integrated with enterprise tools like JIRA etc. to ensure ease of use

Business Benefits

33% Productivity gains for the end-to-end execution of QA test cycle
