

Site selection & enrollment forecasting for late-stage trial

Key Challenges

Phase III influenza trial facing critical recruitment delays

- Current site network projected to miss enrollment targets by 32%
- Trial acceleration essential for maintaining market opportunity
- Need for data-driven site selection to optimise patient recruitment

Business Solution

Incedo has developed a 4-stage approach to identify potential new sites and evaluate the trial completion timelines with the recommended sites

- Site Universe Determination
- Prioritization Input Finalization
- Site Scoring & Tiering
- Enrollment Modeling

Business Impact
