

Transformed B2C Payments for a Leading US Bank

Key Challenges

- **No tracking mechanism** for customer payment data
- **Lack of a single platform solution** which incorporates multiple faster payments rails
- **Lack of unified approach** for catering to all B2C use cases

Business Solution

IncedoPay: Accounts Payable SaaS Solution

- > Deployed a common web portal for enrolling end consumers, managing and tracking payments
- > Developed an application to validate end consumer credentials and payment history
- > Incorporated new payment instruction engine to support different payment types - ACH, check, Zelle, RTP, etc.

Business Impact

3x corporate client enrollment improving bank's treasury revenue

80% cost reduction from process automation & digitization
